

SPC-Technology

SPC Technology was founded in 2004 by extensive experienced business IT members in information technology, finance & accounting, hospitality, property management and freight forwarding system. With world class expertise in delivering key business systems with local authority requirement knowledge, we have certainly made many customers happy. Not only in-depth foreseeing the IT trend, we also consult on your business process, delivering out of the box services. Our mission is to give customers cost saving and effective IT business integrated solution.

Our range of services includes delivering and consulting:

- **SunSystems**, a world class midrange accounting & financial solution: We deliver the total solution from fresh installation to implementation and ad-hoc reports, integrating with other systems (such as eBanking, internet expense claim, and front office), training, hotline support and maintenance. We follow SunSystems PQIS (Professional Quality Implementation Services) methodology in delivering SunSystems consulting services. With strong support from alliance Professional Advantage Pty, a regional giant Systems Union agent, combined with our long intensive experience in Vietnam market, we will certainly make you happy with our solution
- **Phoebus**: Robust *interop* application with SunSystems. In comparison with SunSystems, Phoebus has enhanced user interface, powerful analysis capability, and scalability, i.e. remote access over the internet. We have successfully implemented Phoebus over countries in Asia and Africa.
- **Business Intelligent**: Seagate Crystal Report, Vision: Information on your fingertip for IT business users, professionals and decision makers. We have experience in training and delivering universal reporting solution as your needs
- **Lotus Domino** development and implementation for overall workflow process management, i.e. purchase requisitioning approval, application for leave & cash advance approval, budget approval...
- **Freight Forwarding System**: Document and business process management for freight forwarders and integration with Accounting system such as SunSystems, Phoebus
- **HR & Payroll**: Employee profile, time attendance and payroll system management. Integration with smart card and other *RFID* devices.
- Hospitality and property management solution
- **CRM-lite** Customer Relationship Management solution: Lead generation and customer management
- Web design and development, e-Commerce
- Networking and mail server implementation
- Software outsourcing and project management (Visual Basic, C#, Java, .NET)

Partnership with Professional Advantage Pty, Microsoft and FPT.

We always keep in mind to bring our customers business-effective solution in the long run and stability.
